Hobbies and Interest:

- Tutor (I did my part-time job as a Mathematics tutor for secondary, junior high school and high school students for 5 years ago.)
- Volunteering Camp (This is a part of my life, join volunteering activities, helping other people is always fulfills my heart and it leads me to stay with simply life.)
- Science communicator (I joined Young Thai Science Ambassador program in 2015 and can held Science shows. Sometimes, I work as volunteering staff for Science communicator activity such as National Science and Technology Fair.)
- Guitar (I have a guitar. I enjoy playing guitar with my simple skill and also listening guitar finger style.)
- Music (I feel relax when I listen to music. My favorite artist is Ed Sheeran.)
- Visiting natural places (Natural places, mountain, forest, sea and so on, can relieve my tiredness.)

Comments:

I have come to Matsuda lab on September 2017. Therefore, I still have to learn so many things in the lab and in Tokyo Tech as well. Sensei and lab members are really good to me. They give me a lot of advices to spend my time here easier.
