

Samantha Verina

Master 2nd year

From Palembang, Indonesia

▶ Education

- ▶ 2007-2010 Xaverius 1 Senior High School, Palembang
- ▶ 2011-2012 Tokyo Japanese Language Education Center
- ▶ 2012-2015 Nara National College of Technology, majoring in Chemical Engineering
- ▶ 2015-2017 Tokyo Institute of Technology, Bachelor of Engineering in Biotechnology

▶ Research topic

- ▶ Biocatalytic asymmetric reduction of aldehydes by oxidoreductase.

I am interested in organic chemistry. I did research in organic chemistry lab in the past, and I wish that we could use a more eco-friendly method. Therefore, now I decided to study enzyme. My purpose is to apply our enzyme in more variety of reactions for chemical industry.

▶ Hobbies

- ▶ Nerd stuffs: reading, writing, studying

I enjoy reading science, psychology, biography and some fantasy books (Harry Potter, etc.)

- ▶ Art stuffs: making miniatures and accessories, drawing, and (currently learning) piano

▶ Comments:

I think the most important thing in life is to follow your heart and do the best in your current space. Make small shifts and big shifts towards your dream, and....

NEVER EVER GIVE UP.

Although sometimes, you need to adjust a little bit ;)
